

Customer Journey Map

7.PROJECT DOCUMENTATION

Date	4 July 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well Being
Maximum Marks	1 Mark

Project Executable Files

This document lists all the executable scripts, source codes, templates, and binary assets that form our complete project solution.

Codebase Inventory & Paths

All files are stored in the active project workspace directory:
C:\Users\User\.gemini\antigravity\scratch\hdi_predictor.

1. Executable Python Scripts

- [app.py](#): The web application server entry point. Configures routing logic, validations, and logs.
- [train_model.py](#): The ML pipeline. Runs raw ingestion, pre-processing, plotting, and linear fitting.

2. Configurations & Packages

- [config.py](#): Central configuration parameters class.
- [requirements.txt](#): List of Python libraries required for runtime operations.
- [.gitignore](#): Standard Git ignore configuration.

3. Visualizations & Binary Assets

- **Model Binaries (models/)**:
 - `hdi_model.pkl`: Serialized Linear Regression model parameters.
 - `scaler.pkl`: Serialized StandardScaler binary.
- **Data Sheets (dataset/)**:
 - `hdi_raw.csv`: Raw downloaded UN statistical metrics.
 - `hdi_processed.csv`: Cleaned panel format dataset.
- **Plots (static/plots/)**:
 - `correlation_matrix.png`, `hdi_distribution.png`, `gni_vs_hdi_scatter.png`, `life_expectancy_vs_hdi.png`, `box_plots.png`, `pair_plot.png`, `strip_plot.png`.

4. Jinja2 Layout Templates (templates/)

- `base.html`: Main shell template.
- `index.html`: Dashboard grid and forms.
- `result.html`: Predicted values card and suggestions.
- `about.html`: Math formulas and coefficients table.
- `404.html`, `500.html`: Custom error overrides.

5. Static Assets (static/)

- `css/style.css`: Theme control CSS variables, glassmorphic layout tokens, printing style rules.
- `js/script.js`: Syncing sliders, dark mode controls, country metric prefills, LocalStorage cache handlers.

6. Tests Package (tests/)

- `test_app.py`: Route validation test routines.
- `test_model.py`: Training fit test routines.
